

Why in the World Is Kevin Lane of Lane Family Financial Sending You Real Shredded Money?

Dear <FIRST>>,

Yes, it is **real** shredded money. Why did I send this to you? To illustrate an important point.

This year, the banks are going to take money away from millions of good people who are simply trying to pay the debt they owe on the credit cards, their mortgage loans, auto loans, students loans and the list goes on... You may as well take the money right out of your wallet and drop it in your shredder, because that is essentially what you're doing each month, wasting your hard earned money.

Just take a look at what's happening and you'll see.

Today, the average household is more than \$117,000 in debt and household savings is down to just \$392 per year. However, a very small percentage of Americans are debt-free and living the life they've always dreamed. So instead of paying the banks their hard earned money, they're paying themselves!

Which will you be? The 80%-90% who are making the banks and credit card companies rich – or the few who are putting that money back into their pockets?

You deserve a break – it's just NOT fair!

I can help you eliminate ALL your debt now. Don't throw away the money you worked so hard to earn. I can put cash back in your pocket in an automated way that makes it easy for you to pay down your debt.

This is the same system hundreds of our clients are already using to save themselves \$150,000, \$250,000 and as much as \$500,000. That's money they're putting right back into their own bank accounts!

And based on the information you've already shared with my office, I'm convinced we can help you too. In fact, you can use this bank bag to deposit ALL the money you save! That's why it's so important that you get your financial information to us ASAP so we can help you get out from under that debt.

Right now, it may sound too good to be true. I know what you're going through because I've been there before myself. It wasn't too long ago that I found myself more than \$43,000 in debt. I

don't even know how it happened because I had always paid off my bills at the end of each month. But as the bills began to pile up, I told myself, "I'll pay it next month." But then something else came up. My children needed new clothes, the car needed fixed, an appliance needed repair ... and I didn't want to say, "No."

But then I discovered an automated system that pays down your debt using the money you're already making.

Within a few short years, ALL my debt was paid off. I couldn't believe how easy it was to do. Best of all, I didn't have to create a belt-tightening budget ... eat bologna sandwiches every day ... or ride a bike to work every day for the rest of my life. And I could still save all this money and pay off my debts much faster than I could have done it on my own.

Eliminate ALL your debt (including your mortgage) using the money you already earn - & become financially FREE!

This same automated system is now helping thousands of clients who also got sucked into using "easy money" and are now debt-free!

I can help you eliminate ALL your debt (including your mortgage payments) 50%-70% faster using the money you already earn right now. Imagine getting rid of your high interest credit card bills in just 3 years and wiping out your mortgage payments in just 9 years!

I look forward to meeting with you so you can see for yourself how much money you can put back into *your* bank account!
